

SHYPTO

Crypto for community and climate

The problem

- Climate change is ravaging our planet
- Economic systems are collapsing
- Communities are crumbling

The solution

- Harnessing the power of cryptocurrencies and other web3 technologies
- Building modern infrastructure (both physical and community) where it is needed the most
- Capturing carbon and sequestering our future

The product: SHYPTO

- The worlds first Seastead-based climate change combating crypto project
- Solar arrays power crypto mining and other web3 services
- Waste heat and sun grow algae for food production and carbon sequestration
- SHYPTO provides housing, jobs, and community for workers creating a new economic model that is good for the planet

Market size

- The global crypto market cap is **\$US981B**¹
- More than **US\$222b** invested in climate tech since 2013²
- Climate tech now accounts for **14 cents of every venture capital dollar**²
- European carbon prices are on track to smash through their all time high of **€100 a tonne**³
- US housing market alone is worth **\$US43.4 trillion**⁴
- Expected future market of \$???

Business model

1. Provide mining, hosting and other web3 blockchain services from inside a competitive legal jurisdiction
2. Sequester carbon in algae to
 - create carbon credits on international markets
 - Sell as a nutritious and environmentally food source
3. Create housing infrastructure for immediate sale and ongoing rental income
4. Reinvest profits to build more SHYPTO complexes across the seven seas

Underlying magic

Crypto has been perceived as an environmentally hazardous joke – this business model turns it on its head creating communities and combating climate change.

SHYPTO is a paradigm shift for web3, climate change, and society.

Competitors

There are currently no direct competitors to SHYPTO

Other Seastead projects focus on libertarian ideals of 'freedom' or act as tax havens – they have not seen the potential in truly challenging climate change and the collapse of communities.

SHYPTO Alpha

Planning is already underway for SHYPTO Alpha

Technical designs for our first facility are already well progressed

SHYPTO Alpha: our first facility is expected to be habitable and operational in the Pacific by 2029
